of privacy and daylighting. Resin cladding allows for an array of colors as well as a lightweight and flexible construction that designers can modify to suit myriad applications. Made from recycled content, these resin panels are suitable for use as countertops, backsplashes, wall coverings and multiple other solutions. Jali is PVC and formaldehyde free and produces zero VOC emissions, per the maker. [sensitile.com](http://sensitile.com)

**14. Trex Commercial Products Ascent**  
Ascent is a post-supported glass windscreen suitable for exterior use in commercial hospitality applications, specifically balconies and outdoor dining areas. This system can handle 80 psf wind loads. It comes at a standard height of 6 feet but can be customized based

on project needs. Ascent uses an aluminum snap-fit system with concealed fasteners. With one side of the post in place, the glass is positioned in front of the system and held in by double-sided foam tape. The tape holds the first pane of glass in while the next piece of glass is installed. The cover is then snapped in from the front, securing the half-inch glass panel in place. To prevent corrosion, the posts are secured with an embedment or welded base plate, avoiding any contact with concrete. [trexcommercial.com](http://trexcommercial.com)

**15. Walters' Regatta Collection**  
Designed by renowned architect Jeffrey Beers, The Regatta Collection of resort lounge and dining furniture is aesthetically nautical and

modern. This line of outdoor furniture includes an armchair, dining chair, barstool, dining table and cocktail table. The line features a neutral color palette, and designers can choose to customize their selections through the use of accent colors and woven cord. [walterswickler.com](http://walterswickler.com)

**16. E = LED lighting by Yellow Goat Design**  
A design by mathematical equation, E = is a large-scale contemporary lighting design. This hanging pendant scatters the light in elegant magnetic fields around a room. Lit by LED bi-pins, handblown glass and crystal balls are fixed to rods and mounted to a polished aluminum core in strict, calculated locations. E = is available in a variety of finishes such as brass, gold and silver. [yellowgoatdesign.com](http://yellowgoatdesign.com)
